EDUCATION

Parul University

Bachelor of Engineering in Computer Science

Vadodara, Gujarat

2023 - 2027

EXPERIENCE

Freelancer

June 2019 – Present

Self Employed

- Successfully crafted engaging content for a YouTube channel, enhancing viewer engagement.
- Adept at identifying customer needs swiftly, leveraging strong UI/UX design skills to deliver impactful solutions.
- Provided technical support for hardware/software issues including RAM installation, GPU troubleshooting, and performance tuning.
- Effectively communicated with clients to understand project requirements, provide updates, and ensure satisfaction throughout the development process.
- Designed modern personal website portfolios and created promotional posters, banners, and thumbnails.

PROJECTS

MealMaps | *React, RestAPI*

- Developed a responsive calorie calculator web app that determines daily and per-meal calorie needs based on user input
- Implemented logic to suggest calorie intake per meal and provided corresponding meal suggestions based on calculated nutritional needs.
- Ensured accessibility and user engagement with clear layout, contrasting colors, and responsive design for multiple devices.

IP Address Tracker | *Geoapify API, React, TypeScript, Git*

- Built a responsive IP address tracker web app displaying geolocation data on a dynamic map using LeafletJS and IPify API.
- Designed and implemented search functionality for domains and IPs, fetching and displaying location, timezone, and ISP info.
- Optimized layout and interactivity for mobile and desktop, ensuring accessibility and smooth UX across devices.

Milan | *React, Git, GitHub*

- Contributed to an open-source platform aimed at connecting NGOs, charities, and volunteers for social causes.
- Fixed UI/UX issues on the home screen and improved copy clarity by correcting typographical errors.
- Collaborated with a global developer community by extending a fork of the main repository and merging useful contributions.
- Gained experience with large-scale codebases and open-source workflows including branching, syncing forks, and pull requests.
